

The GEISLV-A

FEATURES

- Lightweight
- Less bulky
- Low cost
- Low profile
- Low current

MAKE THE CONNECTION

INTRODUCING THE GEI MINI-SLAVE CONNECTION SERIES

Graywacke's Mini-Nato Cable Series is designed to meet the needs of manufacturers seeking a low-cost, low profile, low amperage alternative to other more expensive, bulkier connector cables. The patented designs give manufacturers a light weight compact and economical solution for their product requirements.

The **NEW** Mini-Nato GEISLV-SR

The new **GEISLV-A** was designed for product power requirements between 50 and 150 amps and as an alternative to bulkier more expensive Slave connectors. If you need to connect to a vehicle's Slave receptacle, then the new GEISLV-A provides a compact, flexible and economic solution. The modular design of the new GEISLV-A allows the user to customize the connector to their specific need using a variety of cable sizes and types.

The **Mini-Nato GEISLV-SR** was created to provide user flexibility for your slave connector needs. The GEISLV-SR will accept any cable gage up to 10 awg, and 35 amps. It is an excellent alternative to other bulkier and more costly connectors. Its simple assembly makes The GEISLV-SR an excellent option for prototyping, small or large run manufacturing, or simply improvising in the field.

The **Mini-Slave Cable** was created to meet the needs of product manufactures seeking a low cost, low profile, low amperage alternative to other more expensive, bulkier connectors. The patented design of the mini slave cable gives manufacturers a light weight, compact and economical solution for their product requirements.

Part#	Rating	Description
GEISLV-LC10	35 amp	10 ft x 10 awg
GEISLV-LC14	20 amp	15 ft x 14 awg
GEISLV-A	150 amp	
GEISLV-SR	35 amp
